---

Cleaner's wage is used to calculate daily cleaning costs. Calculation is based on frequency of service days per week and cleaning per day.

Project wage will be used to calculate project cleaning costs.
InfoClean allows you to add additional tasks, select cleaner’s wage or project wage to calculate the cost for these tasks.
Select the appropriate equipment to be used for your task.

The production rates behind the calculations can be adjusted. The default values are set at 100% and are based on ISSA’s 540 Cleaning Times.
